Profile Headline

"With a solid foundation in Web Development, I possess expertise in creating dynamic and responsive user interfaces."

About Me

To obtain a fresher position as a software engineer in a fast-paced organization where technical skills and creative thinking are useful. A highly motivated software engineer seeking to get a position in a reputed company, where I can use my skills and knowledge to learn new things and grow as a software developer.

Projects

1. Irish Odia Association(React.js, CSS)

Roles and Responsibilities :-

Developed the front-end of the Irish Odia Association website using React JS and CSS. Ensured it worked well on all devices, optimized performance, made navigation user-friendly, and tested it across different browsers for compatibility.

2. Kingsukh Guest House(React.js, CSS)

Roles and Responsibilities :-

Responsible for the development of a sleek and user-friendly GuestHouse website, leveraging React JS and CSS. Directed design efforts to ensure an intuitive interface and optimized performance. Rigorously tested for cross-browser compatibility to guarantee a seamless experience for all users.

3. Instagram Clone(MERN Stack)

Roles and Responsibilities :-

Led the development of a full-stack Instagram Clone for MCA coursework, utilizing React JS, Node.js, Express.js, and MongoDB. Prioritized responsive design, seamless user experience, and efficient data management.

4. E-Book Management System(JEE, MySQL)

Roles and Responsibilities :-

Designed and implemented an E-Book Management System as a key project in my MCA program. Utilized Advanced Java (JEE) and MySQL technologies, overseeing the entire development lifecycle from system architecture to testing and deployment.
